

Lisa Sulkes

Junior Full-Stack Developer

Orange City, FL • 407-308-2456 • hello@lisasulkes.com • <https://www.linkedin.com/in/lisa-p-sulkes-8858132b0>

PROFESSIONAL SUMMARY

Full Stack Developer proficient in JavaScript (ES6+), MongoDB, React, Express.js, and Node.js. Knowledgeable in building cross-platform applications using React Native and Expo. Pursuing AWS Developer and Generative AI certifications to enhance cloud-native solutions. Awarded AWS Academy graduate badges for Cloud Development and Generative AI Foundations.

SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React, Node.js, Express.js, React Native
- **Databases & Cloud:** MongoDB, MySQL, AWS (S3, EC2, RDS, Elastic Beanstalk), Docker
- **Tools & Technologies:** Git/GitHub, Jira, Socket.IO, Auth0, Stripe, RESTful APIs, JWT
- **Methodologies:** Agile Methodologies

EXPERIENCE

Office Manager

January 2009 - Present

E-Tech Restoration, Inc., Orange City, FL

- Maintained multiple digital content pages and one job application form, ensuring accurate information and a seamless user experience.
- Administer company's Ubiquity network infrastructure, including a Dream Machine with 4 SSID networks, and VoIP phone system.
- Streamline daily business operations by managing office administration, HR, accounts payable/receivable, and assisting executive leadership with organizational initiatives.

ACADEMIC EXPERIENCE

Community Night Out

November 2025 - June 2026

- Led end-to-end development, from Figma prototyping to building, testing, and deploying a full-stack React and Node.js decoupled application.
- Managed a 4-week Agile sprint cycle with branch-based GitHub workflows, coordinating 530 commits and 183 pull requests to ensure collaborative and timely project delivery.
- Authored two Admin and Technical Maintenance project hand-off package with scheduled routines and workflow guidelines.

Kitchen Sync

March 2026 - March 2026

- Built and shipped a cross-device kitchen workflow prototype with React Native (Expo) and TypeScript, and NativeWind (Tailwind CSS), enabling real-time shared task coordination across 3 client devices.
- Integrated React front-end components with Node.js APIs, using third-party libraries to control data states and user interactions.
- Collaborated on end-to-end prototyping from concept to functional demo, translating product ideas into a working connected system using Socket.IO for real-time 3-device synchronization.

Spotify Tune Finder

July 2025 - July 2025

- Developed a Spotify-integrated music search application utilizing the MERN stack (React, Node.js, Express.js, MongoDB) and implemented secure user authentication via the Spotify API.
- Debugged front-end components and four back-end data routes, reducing application crashes and improving load times.
- Deployed a monolithic repository with two applications to cloud, improving scalability.

EDUCATION

Bachelor of Science in Web Design & Development (B.S.) • Full Sail University, Winter Park, FL

July 2026

GPA: 3.99.
